\* In 1998, percentages were based on only recent alcohol users who cited a source. This year, percentages are based on all recent alcohol users, even if they skipped this question. This results in small decreases in many of the 2001 results. Therefore, these percentages are not comparable to previous survey results.

\*\* In 1998, percentages were based on recent drug users. This year, because recent use questions were dropped for most substances, the percentages are based on past-year drug users who cited a source, i.e. those who answered this question. Due to this difference, results are not directly comparable to 1998 results.
